

Program #7: Convert input file into formatted Semi Colon Separated file

[New Attempt](#)

Due	Oct 31 by 11:59pm	Points	20	Submitting	a file upload	File Types	pdf
------------	-------------------	---------------	----	-------------------	---------------	-------------------	-----

You are to use the following Languages

C

PYTHON

RUBY

You are to write 3 programs which do the same task. You are to take a file name that contains Last Name, FirstName and sometimes middle Name and produce an output where the format is

FILENAME ';' Last Name ';' FirstName ';' Middle Name

Example input and output files follow

[ConvertCSV input \(https://nmsu.instructure.com/courses/1465037/files/201572757?wrap=1\)](https://nmsu.instructure.com/courses/1465037/files/201572757?wrap=1) 
(https://nmsu.instructure.com/courses/1465037/files/201572757/download?download_frd=1)

[ConvertCSVoutput \(https://nmsu.instructure.com/courses/1465037/files/201572755?wrap=1\)](https://nmsu.instructure.com/courses/1465037/files/201572755?wrap=1)

You are to produce 3 Well documented, with proper header comments including the problem description your name date, etc. you need to explain your algorithm for each solution.

You are then create a SINGLE PDF file which has each program inserted (in a box) and the output (in another BOX) with clear sectioning of the 3 programs. You will have an introduction portion describing the problem and how you want about solving this problem.
